

# Le Bonheur Children's: Building, Saving and Living Green

## Building Green

- Recycled 50 percent of demolition waste
- Building with recycled steel and concrete
- Native plants and drip irrigation
- Low water volume for faucets, toilets, etc.
- Installing bike racks
- Parking spaces for energy-efficient cars
- Building designed to capture maximum natural light
- Efficient modular energy plant

## Saving Green

- Using local contractors and suppliers
- Energy efficient motion sensor switches
- Revitalized Memphis Mental Health Institute site
- Low water volume and drip irrigation reduces water costs
- Developing green energy package with utility companies

## Living Green

- Revitalization of the Medical Center and Legends Park – the future home of FedExFamilyHouse
- Hiring local contractors and suppliers
- Natural light and landscaping provides serene environment
- Bike racks and parking spaces for energy-efficient cars promote health and socially responsible lifestyles
- Job training for neighborhood residents
- In addition to 2,000 employees, an additional 14,147 local jobs are indirectly supported by Le Bonheur
