

# Ground Floor

## Unique Features

The 60-bed Emergency Department handles everything from persistent fever to major traumas, and sees more than 70,000 patients each year. If a patient is transported by helicopter, a dedicated elevator

can deliver a patient to the ED in one minute. The ED also houses a pharmacy, where medicines are quickly dispensed. Radiology plays an integral role performing more than 80,000 exams each year.

# Lobby Level

Poplar Avenue

Dunlap Street

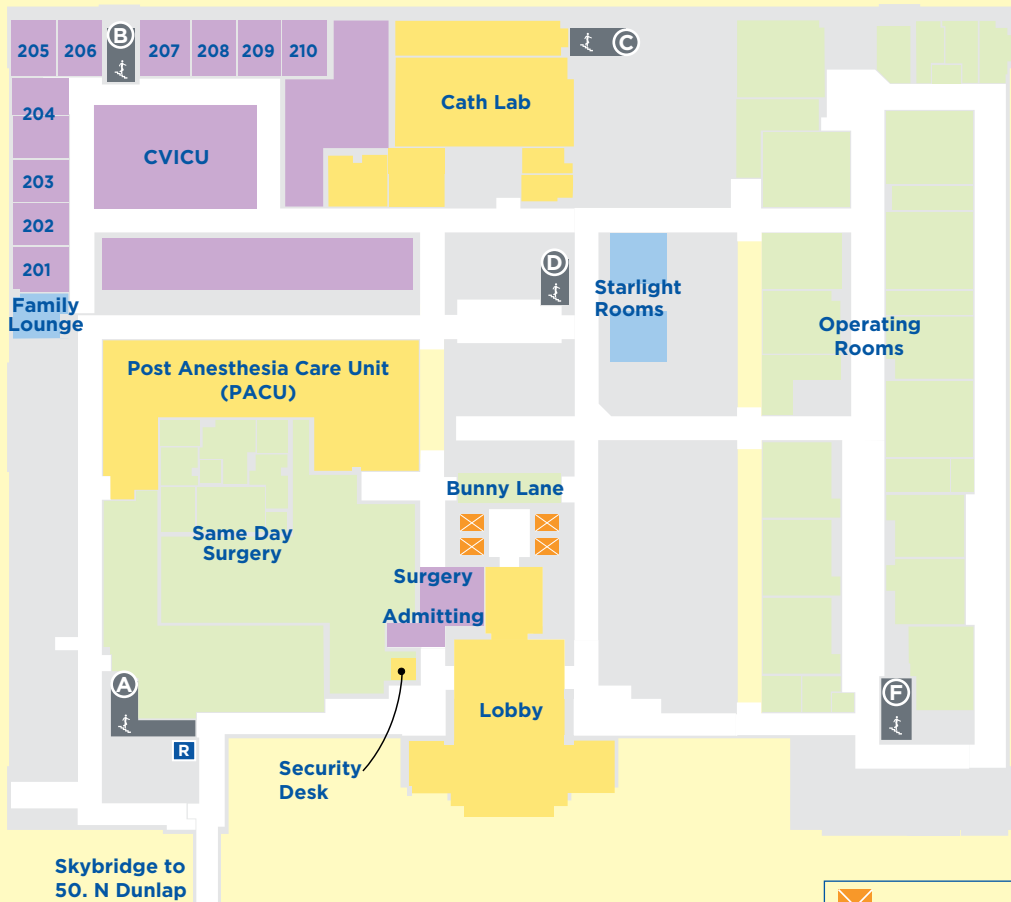

## Unique Features

The main lobby, gift shop, heart & neurology clinics, and the cashier are located on the Lobby Level. The cafeteria offers drinks, soup and salad bar, grill, pizza station and an espresso bar. The chapel accommodates group worship and private time for prayer and reflection. There is also a separate eastern-facing prayer room. The Le Bonheur Club Family Resource Center has a living

room area, a kitchenette, computer area to work while away from the office and a library with educational resources. Thanks to donations from Le Bonheur Associates, patients and families can now enjoy a trip to the movies by visiting the Room of Magic, a state-of-the-art mini-movie theater that shows first-run movies.

# 2nd Floor

	= Public Elevators
	= Public Restrooms

## Unique Features

The 2nd floor is home to 15 state-of-the-art operating rooms (ORs). Before patients receive anesthesia, they are encouraged to pick out a toy in Bunny Lane. The 3T intraoperative MRI (iMRI) is a new feature that provides high resolution images before, during and after an operation without the patient

leaving the OR. The CVICU cares for heart patients, and some procedures can be performed at the bedside for optimum patient comfort. The Post Anesthesia Care Unit (PACU) and Same Day Surgery share one area with 37 bays. A large playroom near this area will help keep patients entertained.

# 4th Floor

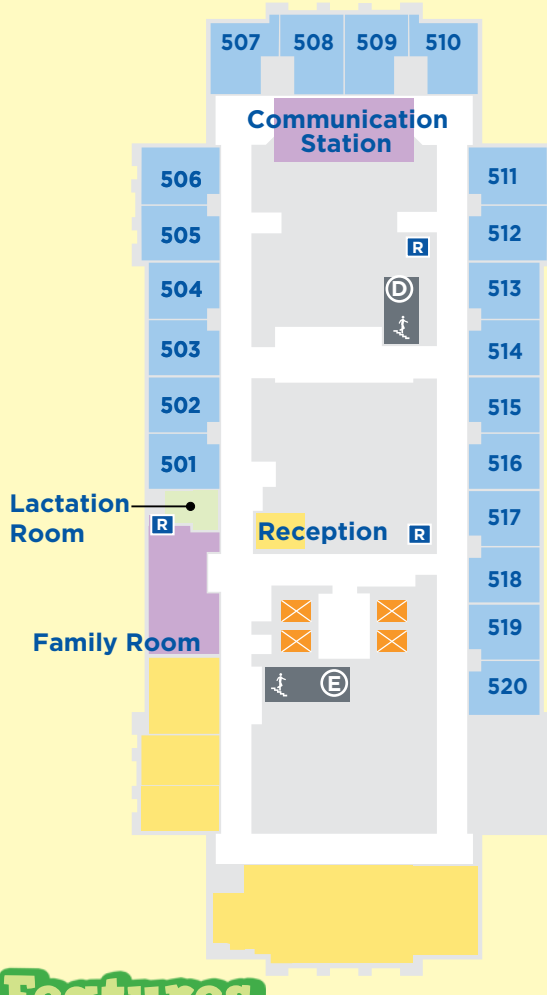

## Neonatal Intensive Care Unit (NICU)

## Unique Features

There are 60 NICU patient rooms. The rooms allow space to sleep two adults, and the floor houses a private consultation room and family rooms. Special rooms for twins allow parents to have both children in the same room.

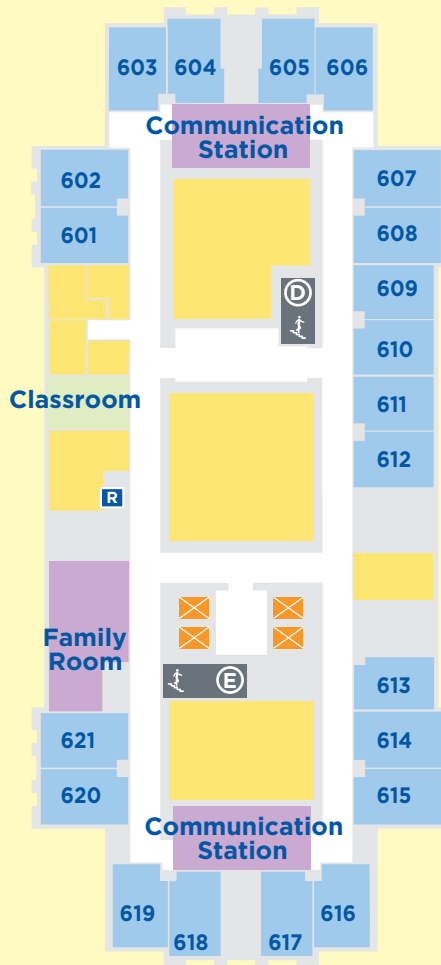

Another feature of the patient rooms are the nurse servers located close to the ground. The small door allows for trash and dirty linens to be taken out of the room without disturbing the patient and family.

### Unique Features

- R** = Public Restrooms
- Yellow** = Support Space
- Orange X** = Public Elevators

There are 20 large patient rooms on the PICU floor to offer privacy for patients and families. The rooms can sleep two family members with a lounge chair and sofa that convert to beds. Along with a pharmacy and state-of-the-art equipment, the floor also has a private family area and storage for toys that can be brought to the patient's room.

- R** = Public Restrooms
- Yellow** = Support Space
- Orange X** = Public Elevators

## Unique Features

Our Intermediate Care floor - the first of its kind in Tennessee - is a 21-bed unit specializing in the care of technology-dependent children. This floor is designed for children

who have graduated from the PICU, but are still in need of Le Bonheur services. The 6th floor also has a family room and playroom for patients and siblings.

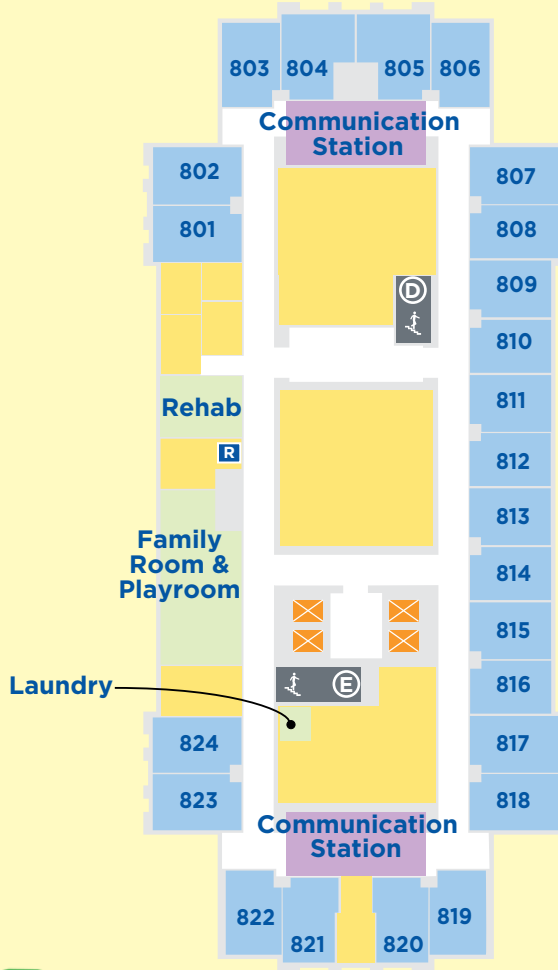

- R** = Public Restrooms
- Yellow** = Support Space
- Orange X** = Public Elevators

## Unique Features

There are 24 beds on the 7th floor - 10 dedicated to the epilepsy patients and 14 for neurology and neurosurgical patients. Each year about 1,500 children are treated through Le Bonheur's neurosciences program. The EMU cares for children being tested for neurological conditions like epilepsy. There is a rehab room on

the floor providing a location for therapy in close proximity to patient rooms. Also housed on the 7th floor is a specialized playroom designed for children with neurological conditions. Wireless technology in the EMU allows patients to move freely around the unit.

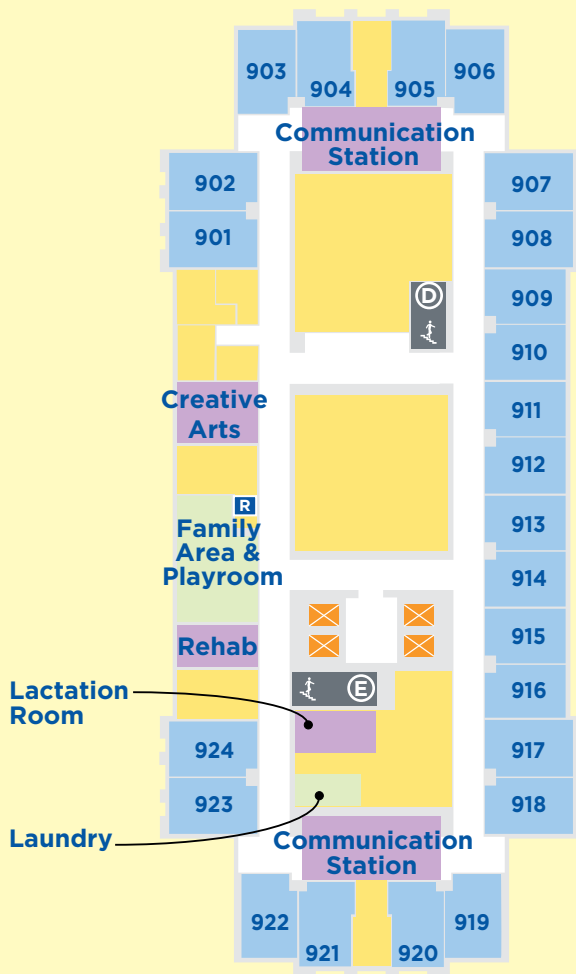

## Unique Features

The 8th floor has 24 beds dedicated to caring for infants and toddlers. The floor is outfitted with age-appropriate equipment and toys. A family

room allows for patients' families to have a comfortable space on the floor. A rehabilitation room allows patients to receive rehab near their room.

<b>R</b>	= Public Restrooms
	= Support Space
	= Public Elevators

## Unique Features

The 9th floor has 24 beds dedicated to patients needing hematology and orthopaedics care. Our hematology staff works closely with the staff at St. Jude Children's Research Hospital to evaluate and treat patients. Orthopaedic services include a wide range of pediatric care,

from the treatment of simple fractures to the management of multiple traumas. This floor houses the Creative Arts room for art therapy projects. A rehab room is conveniently located just down the hall from patients' rooms.

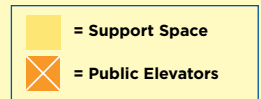

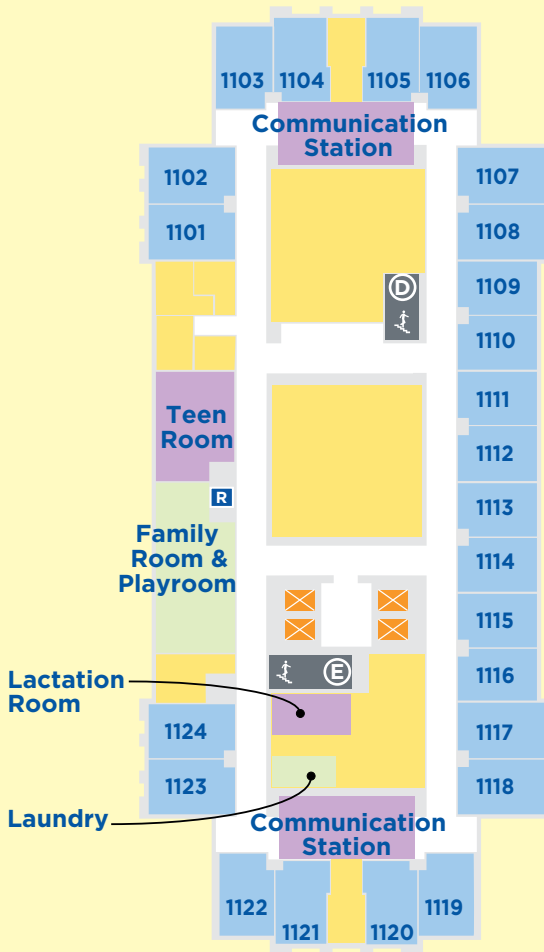

# 10th Floor Surgical/ Cardiology Unit

## Unique Features

The 10th floor of the hospital has 24 beds dedicated to patients after surgeries. There is a family room and playroom for families, as well as a classroom for patients and siblings. The hospital school program is an

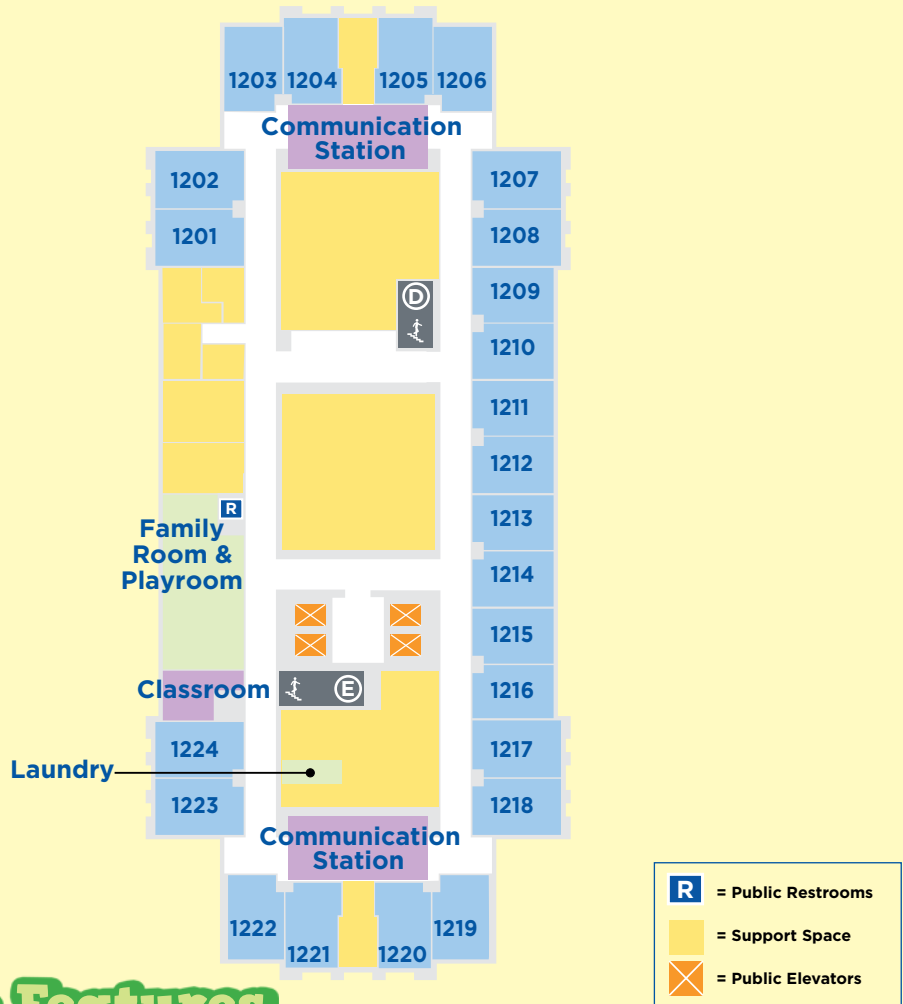

accredited school that provides year-round school services to patients from K-12. These services are provided to help patients remain on track with their studies while in the hospital.

## Unique Features

The 11th floor has 24 beds dedicated to caring for patients with respiratory diagnoses, a family room and playroom for patients and siblings. Also housed on the 11th floor is the Teen Room. The

Teen Room is a special place just for teenage patients and siblings to hang out. Conversations with health care providers about diagnosis or treatment are off limits in the Teen Room.

## Unique Features

The 12th floor of the hospital has 24 beds for patients with a range of medical needs including diabetes, renal, or gastrointestinal issues. There is a family room and playroom

for families, as well as a classroom for patients and siblings. The 12th floor boasts beautiful views of downtown and midtown Memphis.
