

Ophthalmology services offered at Le Bonheur Children's Hospital and Le Bonheur East Surgery Center encompass a range of eye care services for infants, children and adolescents. Pediatric ophthalmologists provide care for common eye disorders of childhood as well as comprehensive intervention for children with cancer, neuro-ophthalmic disorders, inherited and neonatal retinal disorders, anterior segment and glaucomatous diseases.

Drawing on the unique resources at Le Bonheur, the team includes pediatric ophthalmologists, subspecialty ophthalmologists, neurologists, neurosurgeons, anesthesiologists, radiologists and other pediatric sub-specialists. These experienced specialists work collaboratively to comprise an eye care team that is unduplicated in the Mid-South.

The ophthalmology team provides treatment for eye-related diseases and disorders including:

- Cancer and tumors of the eyes, eyelids and orbits
- Glaucoma and cataracts
- Inherited and surgical diseases of the retina
- Motility and strabismus disorders
