

Pediatric otolaryngologists at Le Bonheur provide medical and surgical treatment for children with diseases of the ear, nose and throat. Services include:

- Diagnosis and treatment of ear, nose and throat diseases
- Head and neck diseases
- Surgery of the head and neck

Le Bonheur otolaryngologists also work in conjunction with audiology and speech-language pathologists to help identify communication disorders in children and set a treatment course.

## **Audiology Services**

(901) 287-5241

Hours: Monday-Friday

8 a.m. – 4:30 p.m.

## **Screening Services**

It is required by law that every child receive a newborn hearing screen. Most babies will have this done at their birth hospital. If your child was not tested or did not pass the first time, a hearing screen needs to be done by the time your baby is one month old.

Hearing assessments are currently performed on newborns age younger than 6 months in the Neonatal Intensive Care Unit and Intermediate Care Unit. In addition, auditory brain response testing with sedation can be performed if necessary.

## **Diagnostic Services**

At Le Bonheur Children's, audiologists perform several different kinds of hearing tests. Your child may need one or more of the following tests to measure their exact hearing level. Services include:

- Auditory Brainstem Response (ABR)
- Otoacoustic Emissions (OAE)
- Tympanometry
- Audiograms
