

Le Bonheur Children's Hospital Child Life Clinical Internship Program

The child life clinical internship is a concentrated 16-week (640 hours) placement within the health care system where qualified students gain practical experience in the child life profession.

The primary goal of Le Bonheur's child life clinical internship program is to provide an opportunity for students to evaluate the strengths and limitations of their current knowledge and to broaden their understanding of the child life profession.

The child life intern, with the guidance and supervision of a Certified Child Life Specialist, participates in the development and implementation of therapeutic, educational and recreational activities for the patients and the families of Le Bonheur Children's Hospital based on an understanding of child development.
