Beyond the Walls
Methodist Le Bonheur Community Outreach Strategy

As a health care organization, Methodist Le Bonheur Healthcare (MLH) has a responsibility to our community. This responsibility leads us to partner with our citizens to promote and protect their own health and well-being. Our Community Outreach division is committed to providing evidence-based services for children and families and working with community partners to improve health in the counties we serve. This strategy guides our work as we strive to create a healthier community.

Address the unique health needs of our community
We believe it is our responsibility to strategically evaluate and select programs that address the unique health needs of individuals in our community. Successful programs will demonstrate:

- Focus on recognized community health needs
- Fit with MLH mission
- Capabilities to create impact with MLH expertise

Demonstrate meaningful outcomes
We are focused on studying and improving the health of our community. By using established best practices with solid clinical oversight and monitoring our progress, we continuously learn how to be better. We evaluate, make changes and ultimately deliver better results. To demonstrate outcomes, we will:

- Define anticipated health impact
- Measure the impact with specific metrics
- Learn and continuously improve

Ensure sustainability
We are dedicated to long-term community change. In order to support this mission, we must secure sustainable sources of funding and manage our resources effectively. To ensure sustainability, we will:

- Diversify funding sources and seek new sources
- Control costs and maximize resources
- Demonstrate return on investment for funders

Develop infrastructure and expertise
We recognize that our people are our greatest resource, and working together means that all of our programs benefit from the expertise of the group. To develop an effective infrastructure, we will:

- Bring people together in one organization to foster collaboration and teamwork
- Invest in technology to support cross-program integration
- Build collaboration with other MLH care teams to enhance continuity of care
- Consolidate all community health operations at 600 Jefferson

Develop meaningful partnerships to extend our reach
We will develop partnerships with those organizations that are experts in other areas of community work and connect our clients to the resources they need to be healthier. To extend our reach, we will:

- Engage in meaningful community collaborations
- Develop a trusted network of partners
- Create a consensus voice to advocate for community needs
In the Community

- 250 staff
- 100,000 children and adults served annually
- More than 20 evidence-based programs
- Focused on children and families
- $28.6 million annual investment
- Funded by grants, philanthropy and service contracts
- More than 30 years serving our community
- Medical leadership provided by University of Tennessee Center for Health Sciences physicians
- More than 500 community partners, including churches, schools, child care centers, community organizations, businesses and governmental agencies

Sources of Funding

- 31% Grants
- 11% Philanthropy
- 58% Contracts

CHAMP, Changing High-Risk Asthma in Memphis through Partnership – A program that targets asthma, the most chronic disease of childhood. A team of physicians, nurses, a respiratory therapist and community health workers teach families how to better manage asthma and address the triggers that cause attacks. Of the nearly 800 children enrolled in the program, hospitalizations are down 70 percent, and the cost to care for each child has been cut in half. With technical assistance from the Green & Healthy Homes Initiative Le Bonheur is seeking to secure investments in asthma-related housing, preventive health care management and legal services which have been proven to yield health care cost savings.

Be Proud! Be Responsible! – A two-week program that empowers teenagers to develop a sense of pride, self-confidence and self-respect through sexual disease education, safe-sex practices and life skills-building activities. Le Bonheur educators teach more than 4,000 teens annually in community centers, churches and Shelby County schools.

Community HIV Network – A network of programs that cares for individuals infected and affected by HIV, by diagnosing new cases and facilitating connections to care. Our community, one of the worst in the country for HIV and AIDS is making progress in fighting the epidemic; recent epidemiologic data indicates that Memphis has improved from 6th highest in the country for new HIV infections down to 8th, and an even more remarkable achievement is that we have moved from the 2nd highest rate of new AIDS cases in the U.S., down to 12th. More than 98% of the 222 babies born to HIV positive women served in our program were born HIV negative.
Child Safety – Multiple programs and initiatives are dedicated to the safety of children.

Safe Kids Mid-South works to prevent accidental injuries to children. Safe Kids programs and partnerships include: Buckle Up to educate proper installation and use of child safety seats; Car Seats and Cribs for Kids to promote safe transportation and safe sleep practices; Splash Mid-South to provide swimming lessons to the underserved; Walk This Way to make changes in the environment to make pedestrians safer in school zones; Sports Safety clinics for athletes, coaches and parents and many other programs to raise awareness and promote safety to children and their families.

Annually, 10,000 children and 30,000 adults participate in Safe Kids programs.

We work on many other initiatives with community partners to promote safety in the community. Multidisciplinary and collaborative teams are working to pilot a safe sleep program for children’s hospitals in the State of Tennessee and to address firearm safety in the community. Additionally we provide training for our Associates and physicians to teach them to protect children from sexual abuse.

Be Proud! Be Responsible! Memphis! – Teen births in Shelby County have dropped dramatically; however, with a teen birth rate of 40.1 per 1000, Shelby County teen birth rates remain higher than both the national average of 22.0 births per 1000 and the Tennessee average of 33.0 births per 1000. To help address this issue, Le Bonheur applied for and received a federal grant to implement Be Proud! Be Responsible! Memphis! The program aims to increase knowledge and eliminate or reduce risky sexual behaviors among adolescent populations.

Teen Birth Rate Ages 15-19
2004-2015

Rate per 1,000 Population

Tennessee
United States

Radika Takes a Ride, Safe Kids Mid-South – Safe Kids Mid-South developed an activity/coloring book to encourage bicycle helmet use among children. This book is based upon a true story of a local teenager, Radhika, who suffered a traumatic head injury from a crash while not wearing a helmet. The book highlights her experience and, most importantly, the importance of wearing a helmet.
Intervention to promote healthy child development and support for effective parenting

**Nurse Family Partnership** – An evidenced-based home visitation program that has shown improvements in pregnancy outcomes, the health, well-being and self-sufficiency of low-income, first-time parents and their children. Women are enrolled prenatally and receive regular visits by a nurse until the child’s second birthday. Since 2010 more than 800 mothers and their babies have completed the program. Of the participants, 89 percent of babies are born full-term, 75 percent of mothers initiate breastfeeding and 97 percent of toddlers are current with immunizations.

**Family Resilience Initiative** – Housed within Le Bonheur’s primary care clinic, Family Resilience Initiative screens children for Adverse Childhood Experiences (ACEs) in order to provide referrals for supportive services to improve health. Two thirds of the clinic’s patients have at least four ACEs and one-third have issues related to food and housing insecurity.

**Healthy Families** – A home visitation service for young mothers, following children from birth through the age of 5 years. The program follows the nationally recognized Healthy Families America Model which is an evidenced-based home visiting model that works with overburdened families who are at-risk for adverse childhood experiences. Since 2007, more than 800 families have completed the program.
**Community Developmental Services**

Community Developmental Services are provided in settings outside of the hospital to support the growth and health of children.

- Early Interventional Services, including behavioral, physical and developmental therapy, are provided to children with developmental delays in the familiar settings of the home, child care facilities and community settings. Approximately 3,000 children are served annually.
- Early Childhood Services are provided by staff who partner with child care facilities to improve overall quality and encourage full inclusion of young children with significant health issues. Through the Inclusion Support program and the Childcare Resources and Referral Program last year, nearly 3,000 educators in child care facilities and 700 parents received assistance. More than 300 children received direct care for ongoing health, medical and developmental needs in these facilities. Le Bonheur facilitators also identify children with developmental delays and facilitate referrals for therapy services.
- Through a contractual relationship with schools, Le Bonheur’s School Based Therapy program provides speech, occupational and physical therapy to students.

**Reach Out and Read**

School readiness and early childhood literacy are important to the future success of children. Le Bonheur has convened a team from throughout the hospital and community outreach programs to collaborate with community partners to streamline and emphasize the important of literacy efforts and to place books on each hospital floor and community outreach program. Reach Out Read is a national literacy program that gives books to children at doctor’s appointments and promotes reading out loud daily to children.
Promote the health and well-being of families through community partnerships demonstrating both sustainability and impact

**Project Search** – Le Bonheur hosts interns from special education classrooms in Shelby County in a school-to-work program that integrates classroom instruction with hands-on training and work experience. These interns rotate through Le Bonheur departments and learn skills that will hopefully lead them to paid employment. In five years, 45 students with intellectual disabilities or autism have completed this program. **Seven interns have been hired at Le Bonheur.**

**School Health Nursing Program** – Through a contractual relationship with Tipton County Schools more than 20 Le Bonheur nurses provide health-related services and education to nearly 10,000 students and staff. Nurses also provide chronic disease management, first aid for accidents or injuries and health-related education.

**Congregational Health** – Educators conduct health needs assessments for churches and provide evidenced-based chronic disease self-management education and connection to other sources for health education. The program focuses on encouraging positive self-management behaviors to those affected by chronic diseases and their caregivers in order to improve health outcomes.

**Latino Outreach** – Two Hispanic health navigators are based at St. Stephen United Methodist Church to promote health and provide fitness programs for adults. A summer camp focuses on fitness for children.

**The 38109 Project** – Educators provide health screenings at the Riverview Kansas Community Center and identify adults at risk for type 2 diabetes in order to enroll them in diabetes prevention programs.

**Le Bonheur on the Move** – Mobile medical units follow an enhanced medical home model by serving as a primary care provider for communities with limited access to medical support. Last year Le Bonheur served more than 34,000 children through this program.

**Memphis CHiLD** – A medical-legal partnership, including The University of Memphis Cecil C. Humphreys School of Law, Memphis Area Legal Services, University of Tennessee Center for Health Sciences-Department of Pediatrics and Le Bonheur Children’s Hospital. The partnership focuses on identifying the legal and social issues that impact patient health and
provides means to address these issues through direct legal services, education and advocacy for children and their families. **Memphis CHiLD has served 350 families in three years.**

**Memphis/Shelby County Healthy Homes Partnership (HHP)** – As a founding member of the HHP, Le Bonheur with other local health, housing and legal services agencies is working to reduce the impact of home environmental hazards and substandard housing and develop a shared system for program referrals and data. Master Home Environmentalists provide free home assessments to families who have environmental health concerns such as asthma or exposure to lead-based paint and provide information to occupants on how to reduce or manage identified hazards. **Through the efforts of this collaborative, The City of Memphis Division of Housing and Community Development (HCD) has received designation as a Green and Healthy Homes site.**

**Comprehensive Regional Pediatric Center** – As the region’s only comprehensive children’s hospital, Le Bonheur provides education and training for adult hospitals across Tennessee on ways to care for the unique needs of pediatric patients. **Last year the Le Bonheur team conducted more than 50 training sessions in regional hospitals and emergency management services agencies, training more than 750 health care professionals on the stabilization and treatment of critically ill and injured children.**

---

**Healthy Families** – Shelby County’s infant mortality rate reached a historical milestone in 2016 – the lowest in recorded history. There are no silver bullets for reducing infant mortality. This improvement is the result of sustained and focused community effort to address the underlying problems. This success is illustrative of what is possible when efforts of individual organizations and systems are coordinated and aligned. Le Bonheur contributed by maintaining focus on evidenced-based initiatives including teen pregnancy prevention, home visitation programs and access to primary care.
Community Partners

We partner with more than 500 local, regional, state and federal organizations. Together we are working to address the needs of children and families in our community. Below is a list of many of our partners.
